SUBJECT: Label Transport Service (Layer 2 CsC VPN)

1. **Purpose:** This notification is to advise all customer agencies that DISA is offering Defense Information Systems Network (DISN) Label Transport Service (Layer 2 CsC VPN) and inform the agencies of the procedures to request this service.
2. **General Information:** Label Transport Service is an enterprise Virtual Private Network (VPN) service providing a segmented IP service for customers utilizing a Multiprotocol Label Switching (MPLS) Layer 2 VPN. This service enables customers to reduce long haul expenditures using IP as transport for data. It is an alternative service for some Asynchronous Transfer Mode (ATM) and Low-Speed Time Division Multiplexing (LSTDM) customers. As a data service, this new service falls with the DISN Subscription Service (DSS) structure at specific locations.
3. **General Note:** This new service is dependent on acquisition and installation of IP Transport Provider Edge (IPT-PE) router infrastructure and it requires a separate physical interface.
4. **Connection Process:** Guidance for registering this VPN service in the System/Network Approval Process (SNAP) database is provided in the VPN SNAP Registration Process Guide available at: <http://disa.mil/Services/Network-Services/Notices>. In addition, the appendices of the Connection Process Guide (GPC) also provide registration of VPN services in SNAP. The electronic or print copy of the CPG can be accessed at: <http://disa.mil/Services/Network-Services/DISN-Connection-Process/Connection-Process-Guide>.
